RAGBRAI XLVIII COMING TO CLINTON ON JULY 31ST!

We are very excited to host the final stop on the 2021 RAGBRAI route here in Clinton! With over 10,000 riders and their crews coming to our city, there will be some road closures, added parking lots, events, shuttles and so much more information that we want to share. Please see our map on page XX with details on the upcoming event. Thank you to everyone who helped put this all together! Let's welcome our guests to our beautiful city and cheer on the riders!

On July 1, the Iowa emergency notification system called Alert Iowa transitioned over to a new platform. Alert Iowa is a statewide emergency notification system the county uses to send alerts to residents. Improvements to the system will enable Clinton County officials to better communicate emergency information directly to citizens via voice call, text message, and email. The information communicated includes information on inclement weather (if you opt in for those), emergencies in the county and matters of public safety. Non-weather related emergencies may include a possible hazardous material situation, a need for an evacuation, a need to shelter in place, or any other type of community emergency where information about potentially life-saving actions you may need to take to keep yourselves and your families safe need

you begin to see all the benefits of pedaling hard that will lead you to all the wonderful places to see and things to do.

Clinton is similar, it just keeps pedaling and watching the heights of greatness appear. Speaking of which, the City has been pedaling extremely well over the last 18 months. Both current and new Clinton Industrial businesses had over \$260M in capital investments that also included creation of 277 full time and 245 part time jobs. In addition, over \$20.8M in housing/apartment investments are going from the Wilson Building to Riverstone Crossing and the Zara Heights housing subdivisions, all of this while the City continues to reinvest in infrastructure of roads, sewer, and quality of life. The City also saw its biggest employer MercyOne Hospital complete a linear accelerator wing and is

currently completely renovating the emergency room. But wait, a \$8.4 Million, 24,322 square foot, Career and Technical Education (CTE) for Clinton Community College is also being built on the campus in Clinton and finally, the High School broke ground June 28th on their \$65M complete High School renovation. Hang on, there is more to come as we roll on the river for the rest of 2021 into 2022.

Speaking of rolling on the river – how about Register's 48th Annual Great Bicycle Ride Across Iowa (RAGBRAI) Rolling to the River Saturday, July 31st. This will mark the sixth (6th) time RAGBRAI has come to Clinton (2021, 2012, 2004, 1994, 1985 and 1978). Interestingly, DeWitt will be a first time host this year. The bike riders

GOING PLACES LIVING IN CLINTON, IOWA continued on page 3...

ALERT IOWA

to be communicated in real time.

Alert Iowa is available to anyone who lives, works, travels through, or visits Iowa. The address can be your home location, work location, or any other location you care about. You can sign up for multiple addresses if you wish to receive alerts for different cities that you may travel to or have family or friends living in. If you download the Smart911 App to your phone, it will allow you to receive alerts based off of your phone's GPS coordinates.

"Alert Iowa is a great tool that allows us to push official, real-time alerts to our residents," said Chance Kness, Clinton County Emergency Management Coordinator. "It is important for everyone to sign up so we have a quick way of alerting residents of an emergency. Weather alerts are optional."

Kness said it is important to note that residents who are currently signed up to receive Alert Iowa notices will need to sign up again in the new system.

Here are two ways to sign up for the upgraded Alert Iowa:

Create an account on the Clinton County web portal at <https://www.clintoncounty-ia.gov/alertiowa>

Download the Smart911 app from the Apple or Google Play stores.

Family and friends can assist those without computers in signing up. You can also log back in at any time to update your contact information or your notification preferences.

Please be sure to mark the box to the left of Notifications from Clinton County Alerts. This will allow you to receive the Non-Weather related emergency alerts. You can then go and select or de-select the weather notifications you choose to receive. If you don't opt in to the non-weather related alerts, then you will not receive these very important emergency notifications.

To learn more about Alert Iowa in Clinton County, visit <https://www.clintoncounty-ia.gov/alertiowa>. Additional information on the system is available at www.homelandsecurity.iowa.gov.

GOING PLACES LIVING IN CLINTON, IOWA continued from page 1...

will be at the end of over 454.1 miles of riding, climbing 11,954 feet with over 10,000 riders emerging on Main Ave, making their way down Pershing to the 9th Avenue North boat ramp to dip their tire. Giant thanks to all the volunteers and to the RABRAI committee ensuring the best possible experience for all the riders.

The riders will finish on a riverfront that has seen numerous updates and upgrades. From the new benches, swings, seating areas, pots overflowing with flowers, to the Pool and Riverview Stadium parking lots, the Freedom Rock and awesome Downtown/ Chamber home town banners, the stamped concrete for the areas to sit on the river, the Marina, the National Fitness workout area, the Crunelle Statue, the latest memorial to LT Schick at Lubbers Fountain and our mainstays of the RV Campground, Riverview Ball Field and the Municipal Swimming Pool. All showcasing great things to do with a river view.

Speaking of bicycling and traffic, this edition of the Lighthouse has an updated 2021 Traffic Study included. Main highlight showing crashes are down from 2011 (606) to 2019 (415) which is a 30% decrease. Numerous updated roads to include Harts Mill Road, 13th Avenue North, 3rd Street from 17th Avenue

North to Main Avenue, Horseshoe Drive, just to name a few. There also is an introduction to Ward 2 Council Member Corey Robinson and Clinton Regional Water Reclamation Facility (RWRF) Deputy Anthony Tonarelli. Reminder, right around the corner on November 2nd are the elections, the City will have elections for 5 of the 7 Council positions: Ward 1, Ward 2 and Ward 3 along with two (2) At Large positions. This issue also includes the Police discussing Boat Safety, Mental Illness, and Neighborhood Safety tips for parents and burglary prevention. There is an "Alert Iowa" Iowa emergency notification system transitioned to a new platform to notify counties to alert citizens via voice call, text or email. The Airport has information on learning to fly. The Library has numerous events and is excited with the new entrance off 8th Avenue South. With Public Works providing an overview and ordinances on debris and tree trimming. Be sure to check out the Trail networks by Engineering and the newly renovated Lyons Fire Station. In closing, Going Places Living in Clinton Iowa highlights all the momentum the City of Clinton is having due in part to everyone pedaling together. Believing in something bigger than oneself, caring for each other and truly sharing the ride (which is always the best part about life) and what better place to do it than Clinton!

COUNCIL MEMBER SPOTLIGHT: COREY ROBINSON

Corey Robinson recently accepted the appointment to the open 1st Ward seat on June 1, 2021. His appointment to the 1st Ward seat will expire in January of 2022, unless he decides to run for election in the fall of 2021. His plan (as of today) is to run for election, and to serve the citizens of Clinton in this capacity for the next 4 years.

A native of Southern California, Corey moved to the area as a teenager; eventually settling in Clinton to raise his family with wife Kristen. Corey attended Scott Community College, Ashford University, and ultimately received Bachelor and Master's degrees from Columbia Southern University in Alabama.

Corey works full-time for US Foods, a food supplier & distributor to the Food Service and Healthcare industries. He is a Corporate Director of Safety, Health, and Environmental - working with US Foods supply chain to create a safer and healthier workforce. While most days he works from his home office, his job does take

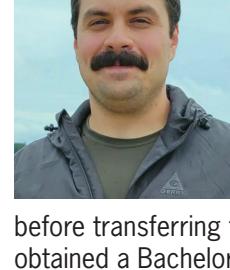

him out of town approximately one week each month. Corey says he looks forward to the week out of the office because he enjoys interfacing with people and helping to solve problems in the field. It is his analytical and diagnostic nature that led him to apply for the open council seat in May. Corey states that he is invested in the Clinton community and would like to be part of the solution that brings about growth and progress to our community.

In addition to his full-time duties with US Foods, Corey owns and operates a real estate investment firm.

Balancing work with play, in his spare time Corey enjoys spending time with his wife and his four children. They have a good time off-roading in their Side by Side UTV. In addition to playing in the mud, Corey and his wife enjoy travelling to the Caribbean Island of Puerto Rico.

If you see Corey out and about, please congratulate him on his appointment.

REGIONAL WATER RECLAMATION FACILITY WELCOME NEW MEMBER

Please help us welcome our newest member to the Regional Water Reclamation Facility, Anthony Tonarelli.

Anthony Tonarelli is a native to Clinton Iowa. He grew up here and graduated in 2012 from CHS. He attended CCC where he earned his Associate's Degree before transferring to the University of Iowa where he obtained a Bachelor's degree.

Since graduating college, he has worked in the field of wastewater where he takes pride in knowing he is creating a safe environment for the community. He has worked hard to acquire his environmental certification through the Iowa Department of Natural Resources, and he currently holds three certifications: Grade II in Water Treatment, Grade II in Water Distribution, and Grade IV in Wastewater Treatment.

Anthony Tonarelli was hired June 1st 2021 to the position of Assistant RWRF Director. This position includes Operations Supervisor, which oversees the daily operations of the Wastewater Treatment Plant and the Treatment Plant Operators. The main responsibilities of this role include:

- Ensure that Operators are properly trained for both safety and operational procedures
- Implement changes to the Treatment Plant system to increase effectiveness and efficiencies
- Maintain and exceed compliance with all EPA, Iowa DNR, and City policies and regulations to ensure the treatment and discharge of the safest quality effluent possible

Anthony looks forward to serving the community and helping the natural environment by maintaining the high level of effectiveness produced by our RWRF and its staff.

PERIPHERAL NEUROPATHY PAIN?

~ Are you tired of taking Gabapentin, Lyrica, or Cymbalta and seeing little or no results, yet seeing many negative side effects?

~ Are you *tired of not being able to enjoy your grandkids because your feet or hands hurt, tingle or are numb?*

~ Are you tired of feeling like you are walking on pins and needles? Feeling like you're walking on broken glass? Feet burning, tingling or numb? Feeling like your feet are on fire?

~ Are your finger tips so numb or painful you have trouble picking up objects or difficulty sewing or crocheting?

Truth about Peripheral Neuropathy

Peripheral neuropathy is a chronic progressive disease resulting in damage to the nerves often causing weakness, pain, numbness, tingling, and the most debilitating balance problems.

This damage is commonly caused by a lack of blood flow to the nerves in the hands and feet which causes the nerves to begin to degenerate due to lack of nutrient and oxygen flow. The blood vessels that surround the nerves become diseased, they shrivel up. This prevents the nerves from getting the needed nutrients to continue to survive. When these nerves begin to 'die' they cause you to have balance problems, pain, numbness, tingling, burning, and many additional symptoms.

Remember when you could bike or walk with your spouse PAIN FREE?

The most common method of neuropathy treatment your doctor will recommend is prescription drugs like Gabapentin, Lyrica, Cymbalta, and Neurontin, which may temporarily reduce your symptoms and are primarily antidepressant or anti-seizure drugs. These drugs may cause you to feel uncomfortable and have a variety of harmful side effects.

What if there was another solution?

Many people are told by their doctor, "You just have to live with the problem or try the drugs" which you don't like taking because they make you feel uncomfortable. Clinton now has a facility that focuses on helping your body heal itself.

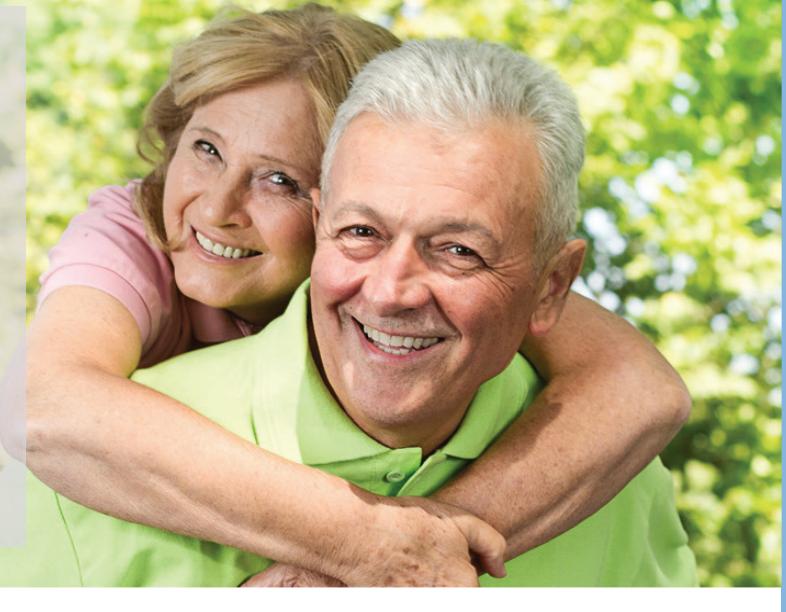

Dr Betts, DC, Med. Ac. Dipl. is an outstanding authority in the field of medical acupuncture. He has a proven non-surgical and non-pharmaceutical integrative solution to help the body regain its ability to heal.

Dr. Betts will do a neuropathy severity examination to determine the extent of the nerve damage. This exam consists of a detailed, sensory, vascular testing, and an analysis of neurological findings.

CLINTON POLICE DEPARTMENT

CLINTON PUBLIC SAFETY:
BOATING

The Clinton Police Department extended its patrol area to include the Mississippi River this summer.

Officers work alongside Clinton Fire-fighters in a variety of tasks on the river. In the past, the Clinton County Sheriff's Office took responsibility for the river bordering Clinton County to include the city. However, Chief Gyron reevaluated the department's role on the river and created a Marine Unit to increase safety for the waterways around Clinton.

The police department received a Justice Administrative Center grant to purchase a 19-foot Brig 570 Navigator Rigid Inflatable boat. The boat is considered a "Public Safety Boat," which

was outfitted with emergency lights bearing the logos of the Clinton Police Department, Fire Department, and the City of Clinton.

Marine Officers received training from the Clinton Fire Department on their Lake Assault (Fireboat) and the Iowa DNR on boat operations and water safety. Officers also had to perform a water (swim) proficiency test.

The primary mission of the Marine Unit is to deter unsafe behavior and assist boaters on the river.

Officers can be used for search and rescue, assist stranded and distressed boaters, and can access areas along the river that were harder to get to in the past.

NEIGHBORHOOD SAFETY TIPS
FOR PARENTS

Unfortunately, no neighborhood is entirely invulnerable to crime. However, there are steps we can take to help keep our families and neighborhoods safe.

1) Know where your children are:

Have your children tell you or ask permission before leaving home and give them a specific time to check-in or be home. When possible, have them provide a phone number of where they will be.

2) Help children learn important phone numbers:

Have your children practice reciting their parent's cell/home phone number and address. If they have trouble memorizing these, write them down on a card and carry them with them.

3) Set limits on where your children can go in your neighborhood:

Do you want them crossing the road, playing in alleys or streets? Are there certain homes in your neighborhood that you don't want your children to go to?

4) Get to know your children's friends: Meet their parents before letting your children go to their homes and keep a list of their phone numbers. If you can't meet their parents, call and talk to them. Ask what your children might do at their house and if they have supervision.

5) Choose a safe house in the neighborhood: Pick a neighbor's house where your children can go if they need help. Then, point out other places to go for help, like stores, libraries, and police stations.

6) Teach children to settle arguments with words, not fists: Role-play talking out problems, walking away from fistfights, and what to do when confronted with bullies. Remind them that taunting and teasing can hurt friends and make enemies.

7) Work together with your neighbors: Watch out for suspicious and unusual behavior in your neighborhood. Get to know your neighbors and their children so you can look out for one another.

REIMAGINING POLICE RESPONSE
TO MENTAL ILLNESS

According to Police Chief Magazine, in October of 1963, President John F. Kennedy signed a bill meant to free thousands of Americans with mental illness from life in institutions. It envisioned building 1,500 outpatient mental health centers to offer them community-based care instead.

Despite the aspirations for the bill, one needs only to look at the police and the criminal justice system's role in responding to mental health issues. Likewise, drug and alcohol addiction and chronic homelessness to see how far the United States is from achieving Kennedy's vision.

The police - and, by extension, the broader criminal justice system have become the government's de facto first responder to persons suffering from mental health issues, drug and alcohol addiction, and chronic homelessness. But, should it be this way?

Clinton Police Chief Kevin Gyron didn't think so.

In January of 2020, Chief Gyron asked his Commanders to help change police response to these complex challenges and proactively provide services for populations in crisis without resorting to arrest or incarceration.

The Clinton Police Department began the change by connecting with the Eastern Iowa Crisis system funded by the Eastern Iowa Mental Health and Disability Services Region (MHDS). We were delighted to find that Eastern Iowa Crisis System had a Mobile Crisis Team. The team is designed to assist officers on calls with a person(s) struggling with mental health. Officers are encouraged to call out Mobile Crisis anytime they feel the person(s) involved would benefit from this service. The advantage of the Mobile Crisis is that once officers made sure there was no threat to the team, they could leave and continue to protect the city. Mobile Crisis stayed and attempted to connect the person with further services.

Planning continued with the Eastern Iowa Crisis system to work towards a successful co-responder model. The police department provided three Crisis Interventionist spaces at the police facility three days a week. The Mental Health Interventionist have become part of everyday life at the police department and ride with officers, responding directly to locations where a person(s) are in crisis. This co-responder model brings the expert directly to the person in need and dramatically enhances care coordination.

The Vera Institute analyzed 911 calls in major cities across the United States. The study showed the following.

- Officers spend a substantial proportion of their time responding to calls for service, few of which are related to crimes in progress, let alone serious crimes in progress.
- Most calls do not relate to serious or violent crime; instead, the most frequent calls involve nuisance complaints and low-level crimes.
- The most frequent incident type was noncriminal in nature, described as a variant of a welfare check and non-emergent.

The study suggested conversations should occur locally about whether certain types of 911 calls for service require a response by police. To that effort, the Clinton Police Department, Eastern Iowa Crisis System, Clinton Fire Department, Communications Director, and Emergency Medical Dispatch-Medical Director have met and made adjustments to how certain calls for service are dispatched. Together we are working towards getting the appropriate assistance for those who are in mental crisis. Those services may include a call to the Crisis Line, Mobile Crisis Response, or Care Coordination.

The Clinton Police Department and Eastern Iowa Crisis System pilot program received funding. To add a Crisis Co-Responder to work with all first responding agencies in the county. This reimagining continues to grow in the region and the state.

We look forward to working with our partners to better serve those in our community.

BURGLARY PREVENTION - AN ALERT COMMUNITY IS A SAFE COMMUNITY

Over 62% of residential burglaries occur during the daylight hours in the US. It is estimated that nearly 40% of all burglaries were by unlawful entry (entry with no force, via an open door or window). The risk of being burglarized can be significantly reduced by taking simple steps to make your home/building more difficult to enter and less enticing to burglars.

10 Quick Security Tips

1. Keep all doors and windows closed and securely fastened. An open window or door is an open invitation for burglars. Thieves are also quick to spot weak locks that may be easily forced open. Doors should have deadbolt locks with a one-inch throw and a reinforced strike plate with three-inch screws. All windows should have window locks.
2. Secure sliding glass doors. Place a metal rod or piece of plywood in the track and install vertical bolts. These will help prevent burglars from forcing the door open or lifting it off the track.
3. Always lock the door to an attached garage. Don't rely on your automatic garage door opener for security.
4. Create the illusion that you are home by using timers on lights, radios, and TV. Making your residence appear occupied, even when no one is home, will deter criminals.
5. Keep the perimeter of your home well lighted. Installing low voltage outdoor lighting is a cost-effective way to discourage intruders, as well as highlight a house.
6. Never leave clues that you are away on a trip. For example, have a trusted neighbor collect mail and newspapers while you are away so delivered items do not accumulate. You can also ask a neighbor to park in your driveway or parking place to make it appear that you are present.

7. Keep some shades and blinds up and curtains open to maintain a normal, everyday appearance in your residence.

8. Never leave a message on your telephone answering machine or on social media pages (i.e., Facebook) telling people that you are away from home. A message that you will return at a certain time leaves your home vulnerable in the interim.

9. Keep shrubbery trimmed away from entrances and walkways. While large, ornate hedges may be beautiful, they also provide a hiding place for burglars who need only a minute to break in through a window or door.

10. When in doubt...Call 9-1-1. We would rather have you call us when something seems wrong than wait until it is too late!

Just in Case...

Sometimes, all your efforts won't stop a determined burglar. Therefore, it's wise to take some precautions that will help you get your property back should a criminal successfully break into your home/building:

- Make a list of your belongings (be sure to keep receipts, especially for expensive items like home entertainment systems, stereos, and computers). Be sure to update this list periodically.
- Keep copies of your inventory list and receipts in a safe deposit box or with a friend. (This is also important in the event of a house fire.)
- Photographing and/or videotaping your possessions are convenient ways to keep a record of what you own. Use Immobilize property register, the world's largest FREE register of possession ownership.
- Engrave your valuables with an identification or mark to deter burglary and prove ownership should the article be stolen and recovered by the police.

CLINTON FIRE DEPARTMENT

When Lyons Fire Station was built at its present location in 1914, Clinton was a community on the move. Van Allens were building a new 4 story department store on the corner of 5th Ave and 2nd St., and McEleney Motors was taking orders for new cars in the Lyons area. The community was growing, and it was identified that the old wood frame firehouse in Lyons needed replacing. Although still operating with horse-drawn apparatus, the future need for motorized firefighting vehicles was in sight. In the spring of 1914, the City Fathers of Clinton awarded a bid to Miller-Ladehoff Construction to build a new, modern

firehouse in the 2300 block of Roosevelt on the site of the current wood-frame structure. At a total cost of nearly \$6449, the community was investing in the future of fire protection for the North End!

To put 1914 into perspective, that was the year that Henry Ford rolled out the assembly line theory in Detroit, and offered 8-hour workdays at \$5/day! It is the year that Weegham Field, later known as Wrigley Field opened in Chicago, and the year that a rookie named Babe Ruth first took to the mound as a pitcher in Boston. Woodrow Wilson was President, Charlie Chaplin debuted his character "the Tramp", and the first flight from Los Angeles to San Francisco took place.

The station has stood vigilant over Lyons through 100 years of US history: World Wars I and II, the wars in Korea, Vietnam, and the Middle East, The Great Depression, and the civil unrest of the '60s. This station opened when air travel was in its infancy, stood tall when man landed on the moon, and stood taller yet when our country was attacked in 2001. Since 1914, members of the Clinton Fire Department have staffed this station nonstop with pride, dedication, and professionalism. 24 hours/day, 365 days/year... protecting the North end of town and those who live, work, and shop there.

In 2019 the Clinton City leadership saw the need to upgrade Lyons Fire Station to meet the current mission of the Clinton Fire Department in the City of Clinton by adding a 1,360-foot addition attached to the southside of the original building. The addition allows for a larger fire apparatus to be housed in the station. The training area was upgraded to allow for modern electronic technology.

The original building saw many electrical and plumbing upgrades. The kitchen was moved to the new building and the old kitchen was converted to office space. This modern office area realized many electrical/HVAC improvements. The firefighters now have a comfortable place for writing reports and other office work. The second-floor restroom was remodeled and all the plumbing fixtures were upgraded to current building codes.

The 1914 apparatus area will house an ambulance and other additional emergency equipment. A larger area for cleaning/deconning equipment and a down-stairs shower room were added for firefighter safety. The building addition and the improvements to the original building will enhance emergency services for the community for years to come.

BUILDING & NEIGHBORHOOD SERVICES

SMOKE ALARMS

Every year in the United States, over 3,000 people lose their lives in residential fires. Most fire victims die from inhalation of smoke and toxic gases. Most fatal fires occur at night while the victims are asleep.

Along with carbon monoxide detectors and a well-rehearsed fire escape plan, properly installed and maintained smoke alarms in your home can cut your odds of dying in a fire by half or more.

Here are some guidelines on where to locate smoke alarms:

- Install smoke alarms in every sleeping room and in the hallway outside each sleeping room.
- Place at least one smoke alarm on every level of your home.
- Locate the smoke alarm on the room's flat ceiling or on the wall within 12" of the ceiling.
- Avoid placing alarms near the top of peaked ceilings or near air vents; these locations can reduce their effectiveness.

Recent years have seen improvements in smoke alarm technology. Following are several considerations when purchasing a new model:

- Use interconnected smoke alarms (wired or wireless) to provide the earliest possible warning that a fire is occurring.
- "Dual sensor" smoke alarms detect both smolder-

ing and flaming fires, ensuring the most comprehensive coverage.

- Models that are hardwired to your home's electrical power and have battery back-up will provide the best guarantee of being fully-powered when you need them most.
- Many newer models are supplied with long-life batteries which require less frequent replacement or ten-year models with no battery replacement needed.

Once installed, follow these steps to ensure reliability from your device:

- Replace your smoke alarm's battery at least every year, unless its instruction manual states otherwise. The beginning or end of daylight savings time is an ideal time. Certain new models come pre-packaged with lithium batteries rated for ten years of life.
- Press your alarm's test button once a month to make sure it sounds properly. Please know that this only tests the alarm's ability to make noise — the test button does not test its ability to detect smoke.
- Replace your smoke alarm regularly, at the time specified in the instruction manual.
- If a smoke alarm is producing frequent nuisance alarms, do not disable it! Instead, clean it accord-

ing to the instruction manual, or consider using a different type of alarm (photoelectric) that will be less sensitive.

- At the same time, you replace your smoke alarm batteries, replace the batteries in your Carbon Monoxide (CO) alarm.

Building & Neighborhood Services urges families to develop and rehearse an escape plan so that when the smoke alarm sounds, family members can immediately move to a safe location outside the home.

We recommend the following emergency escape practices:

- Develop a home fire escape plan.
- Practice the plan at least twice a year with the entire household.
- Practice the fire escape plan with your children, babysitter, and older family members.
- During practice, identify and remove obstacles that may prevent a quick and safe evacuation, such as clutter, blocked doors or stuck windows.
- Because children may not awaken to the sound of a smoke alarm, parents should hold a nighttime fire drill to assess their children's ability to respond and evacuate.

Don't wait for a fire in your home to test your smoke alarm and develop a fire escape plan --- DO IT NOW!

STRATEGIC PLAN GOALS

The Library Board of Trustees approved the following Strategic Plan Goals for the next 3 to 5 years. Thank you to all the Community Members that gave input for this plan!

Goal #1 Citizens will find information at the library about community services and organizations

their knowledge and use of community resources

Goal #2 Seniors are made aware of programs and services that are a benefit to them through promotional techniques and strategies

Goal #3 Programs for citizens of all ages will address financial, health and safety issues

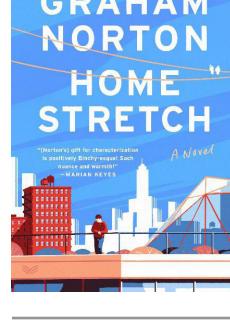

Goal #4 School age children will receive support from the public library and will be made aware of the variety of materials, services, and programs especially for their age group that enhances learning

Goal #5 Explore options for a new building, expansion or renovation to meet the future needs of the community

Goal #6 Community members will have access to better library hours including the Lyons Branch

Goal #7 Community members will find revitalized library space including the Lyons Branch

Goal #8 By utilizing collaborations community members will increase

NEW READS YOU MIGHT HAVE MISSED

In this "compelling, bighearted, emotionally precise page-turner" (Sunday Times), the New York Times bestselling writer and acclaimed television host explores the aftermath of a tragedy on a small-town to illuminate the shame and longing that can flow through generations—and how the secrets of the heart cannot stay buried forever.

UPCOMING FALL PROGRAMS

Please be sure to check our website and social medias to stay in the know. You can also sign up for our e-newsletter, visit <https://clintonpubliclibrary.us/newsletter> to put be on the mailing list.

Staff Spotlight: Selena

Q: How long have you worked at the library?

A: 3 years in August

Q: What do you like most about your position?

A: I enjoy interacting with the public, doing outreach, and helping patrons find what they need. I also enjoy getting creative in the Makerspace and with displays.

Q: What's a recent project or task that you've worked on that you're either particularly proud of or enjoyed contributing to?

A: Recently, I've been able to assist with our Pop-Up library, taking books and activities to public places, like the youth soccer games, and interacting with people of all ages out in the community. It's been a fun way to spread awareness of the library and the services and programs we offer.

Q: What is a typical day like in your job?

A: I usually work part of my day at the circulation desk, helping patrons find materials, checking items in and out, answering reference questions, and assisting patrons with technology questions. I spend the other part of my day in the Makerspace—learning the equipment (3D printer, Cricut, embroidery machine), creating things, and helping patrons learn and create as well.

Q: Favorite book/genre?

A: My favorite book is To Kill a Mockingbird, but recently I've developed an interest in non-fiction that I didn't have when I was younger.

Q: What was the last item you checked out? Was it any good?

A: I just checked out Where the Crawdads Sing. I'm still reading it, but I like it so far.

Q: What are you most likely to be doing on your days off?

A: I spend my days out hanging out with my family—playing games, crafting, or attending my kids' sporting events or music concerts.

LYONS PHOTOGRAPH PROJECT

The Johnson-Lieferman photo collection has been with the Clinton Public Library since 2011. We are now making available these photos/negatives at reasonable prices. If you are interested in purchasing a package that you had done by Johnson or Lieferman Photography please call 563-242-5355 to see if we have this in our collection. These are being sold as-is with no guarantees and no refunds. You may request pickup at the Lyons Branch Library or the Main Library.

You cannot purchase packages of family members or friends. We will ship these packages to anywhere in the U.S. by priority mail with delivery confirmation. Packages are not located on demand so please give us a call first. All proceeds will benefit the Lyons Branch Library. We hope to hear from you soon!

CAMPGROUNDS

AT CLINTON RIVERVIEW PARK

Come stay in one of the area's most popular Campgrounds at Clinton Riverview Park.

Clinton RV Park features 28 camp pads which includes two ADA compliant pads with full hook-up. Campers may stay 14 consecutive days provided they remain current with their fees and must check-out by 3 PM on the 15th day and vacate the campground for a period of 24 hours. Campground fees are \$22/night which includes access to the bath house, 30/50 AMP electric, and water hook up with a dump station on the premises. Our camp hosts – Kevin and Dee Ketelsen – are in camp site 1 to give you the bathroom code and help you with any questions or concerns and can be reached at 563-559-4755. You can also contact the Marina office at 563-242-3600.

Winter stays at the campgrounds is allowed at a reduced rate of \$15 a day for electric hookup only. We have one spigot at the inner circle for a shared water source (not to remain hooked up). Bath house is closed once the water is shut off.

CLINTON MARINA

It's been a great season for the Clinton Marina this year with all of our slips being sold out. Our transient slips are available for \$15/\$30 a night with weekend specials of \$25/\$50 at the 30' mark plus or minus. Come check out our new line of apparel and products. We also sell live bait, ice-cream novelties, drinks & snacks, ice, and an array of Marina items to get you river ready. New this year, we're selling beer from the marina shop at competitive prices. Bring your ID! Don't forget, it's required by law that you carry a life jacket for everyone on board, an air horn or whistle, a throw cushion, and a fire extinguisher – all of which we carry. We also have an on-site mechanic who can help you with your boater/RV repair needs who can be reached at 563-242-0892.

We also offer an assortment of winter storage options for your boat. Winter boat storage goes as follows:

| | |
|-------------------------------------|------------------------|
| Boat Launching for Slip Renters | \$3.00 per linear foot |
| Boat Haul Out for Slip Renters | \$6.00 per linear foot |
| Launching Non-Slip Renter | \$6.00 per linear foot |
| Haul-Out Non-Slip Renter | \$8.00 per linear foot |
| Trailer Assist | \$75.00 flat fee |
| Outdoor Winter Storage (blocks) | \$1.00 per square foot |
| Outdoor WS Non-Slip Renter (blocks) | \$3.00 per square foot |
| Trailer & Jet Ski Storage | \$1.00 per square foot |
| Jet-Ski Slip Rental | See Marina Supervisor |

Marina Mechanic Tyler Jensen of Advance Marine offers an array of services from winterization and wrapping, full service mechanic needs, stereo/sound systems, custom detailing; seat, carpet and canvas repair and much more. He can be reached at 563-242-0892.

ENGINEERING DEPARTMENT

2020 CITY-WIDE TRAFFIC SAFETY REPORT

Introduction

The City of Clinton Engineering Department has initiated the third annual Traffic Safety Report to the City of Clinton City Council, which is aimed at reducing collisions at the locations with the highest collision counts and collision rates within the city limits. The impetus of the report was to provide a background for safety considerations to be made as part of the City of Clinton Transportation Master Plan.

This primary objective of this report is to identify intersections and roadway segments which have experienced a greater than expected amount of collisions over the past 5 calendar years, between 2016 and 2020. Collisions at these intersections have then been analyzed using the Iowa DOT Saver system web-based crash mapping software. Further, each location has been reviewed by the Engineering Department to determine if mitigation measures can be implemented to reduce the likelihood of future collisions.

The goal is to reduce collisions city-wide, with the locations in this report being the priority. The City of Clinton will utilize the report each year to prioritize funding for traffic safety projects. The city should apply for funding each year through the Iowa DOT Traffic Safety Improvement Program. This document will help the council decide between potential application locations. The city should also try to allocate local monies toward other projects as budget allows.

Study Objectives

The primary objective of this report is to identify intersections and roadway segments which have experienced a greater than expected amount of collisions over the past 5 calendar years, between 2016 and 2020.

Another objective of the report is to identify other intersections or roadway segments that meet warrants for upgrades, traffic signals, lane modifications such as widening or three-lane conversions, or other safety modifications.

Collision Data

The collision data used for this report is the Iowa DOT Crash Analysis Tool (ICAT). The ICAT system is an online based application of compiled incident reports compiled by the Iowa DOT and filed by Iowa law enforcement agencies. It is important to note that data contained within this report is exclusively from ICAT system. Before engineering design is completed at any intersection, the department will review copies of the actual police reports obtained from the investigating officer's department.

Reported traffic collisions based on ICAT reporting are the basis for this report. Report totals were obtained for each intersection and roadway segment listed in the report. For the purpose of this report, any intersection with 20 or more collisions in the past 5 years, or any roadway segment with over 4 crashes per million vehicle miles traveled, were chosen for further consideration. There are 25 locations within the city limits meeting these criteria, based on ICAT data.

Based on the collision patterns for these

locations, mitigation measures have been formulated and included in this report.

Traffic Volumes

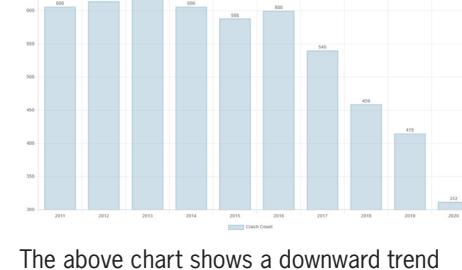

The Iowa DOT performs traffic counts at many of the busy intersections and roadway segments in town every 4 years. The last time traffic counts were performed as part of their program was 2018. The 2018 counts were used for the purposes of this report. Volume counts were used as part of this report to establish average collision rates for each location. The rates are expressed in the following terms:

Intersection = Collisions per million vehicles entering the intersection (MEV)

Roadway Segment = Collisions per million vehicle miles traveled (MVMT)

City-wide collisions

The following chart depicts city-wide collision history over the past 10 years, to draw a baseline trend in front of the analysis.

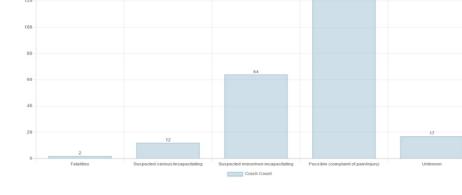

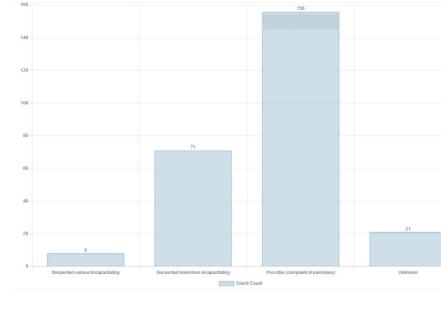

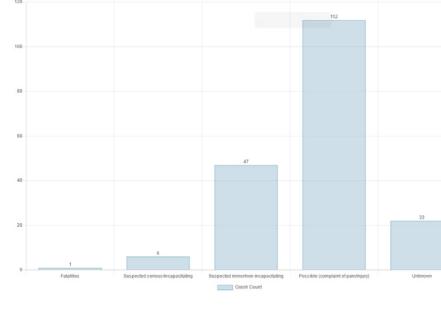

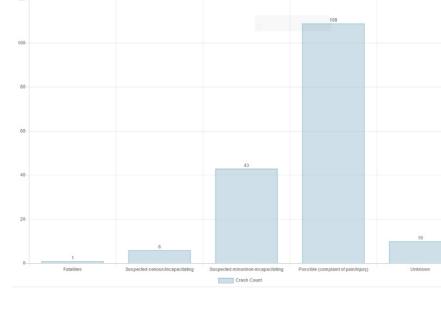

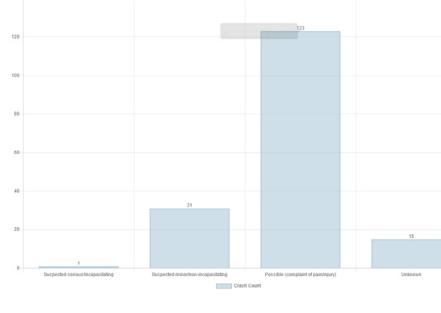

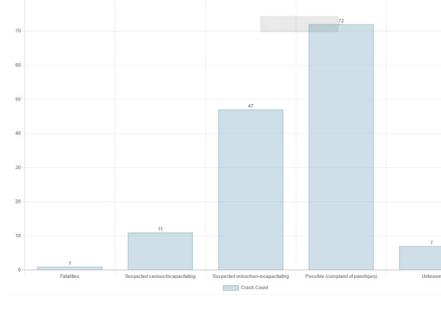

The above chart shows a downward trend over the last 10 years. From 2011 to 2020, reported collisions have decreased from 606 in 2011 to only 342 in 2020, which is a decrease of just over 30% during the 10-year period. Crash totals appear to be down even more in 2020, though the numbers are not quite final.

This is mostly likely attributed to several factors, including improvement projects (e.g. Liberty Square, 19th Avenue North, among others), increased driver awareness and education, enforcement efforts, site distance improvements, and various minor signalization and signage maintenance modifications. Traffic counts have decreased slightly throughout Clinton over many of the locations discussed in this report, but not as steeply as the total crashes have decreased.

Collision Injury History

The following charts depict injuries sustained throughout the past six years of collision history in Clinton. As shown below, total collision injuries sustained from it appears as though collision injuries have steadily decreased from 2015 to 2019, down each year from 272 total injuries in 2015 to 170 in 2019. This is typically a more reliable trend than total reported crashes.

2015 Injuries**2016 Injuries****2017 Injuries****2018 Injuries****2019 Injuries****2020 Injuries****2008 – 2011 Reconstruction of Camanche Avenue & Liberty Avenue**

(Average of 4 crashes per million VMT in 2010, Average of 1.5 crashes per million VMT in 2016-2020)

The evaluation of intersections using collision rates (number of collisions per million entering vehicles for intersections and million vehicle miles traveled for segments) is standard practice in traffic and transportation engineering. This method of evaluation is often chosen over collision counts alone

...continued on page 11

ENGINEERING DEPARTMENT CONTINUED

because the number of collisions generally increases in proportion to traffic volumes. Collision counts were used as performance measures for most of the completed projects because traffic counts were unchanged.

For evaluation of future engineering projects for collision mitigation, collision rates are expressed in the above terms. Where collision counts are high, but the rates are low, additional police enforcement would be recommending in lieu of an improvement project. Recommended mitigation factors or enforcement measures are discussed in the

next section of the report.

Collision rates have been calculated for any intersection having 20 or more accidents over the last 5 years, or rates above 0.70 crashes per million vehicles. Rates have been calculated for any busy roadway segment with over 4 crashes per MVMT (million vehicle miles traveled), and these segments are included within the report. The High Collision Rate Locations are listed on the following page, along with their corresponding collision rates over the past 5 years (2015-2019).

| Intersection | Entering Per Day | MEV Per Year | 5 Yr Crash Ct |
|--|------------------|--------------|---------------|
| 8th Avenue South & South 4th Street | 10367 | 3.783955 | 33 |
| Mill Creek Parkway & 16th St NW | 8044 | 2.93606 | 33 |

| Lincoln Way & South 14th Street | 18993 | 6.932445 | 24 |

High Collision Rate Intersections

At least 20 collisions have occurred at the following 15 intersection locations in Clinton over the past 5 years, from 2015 to 2019. This chart below contains the following information for each intersection location: Entering Vehicles per Day, Million Entering Vehicles per Year, and the 5 Year Crash Count.

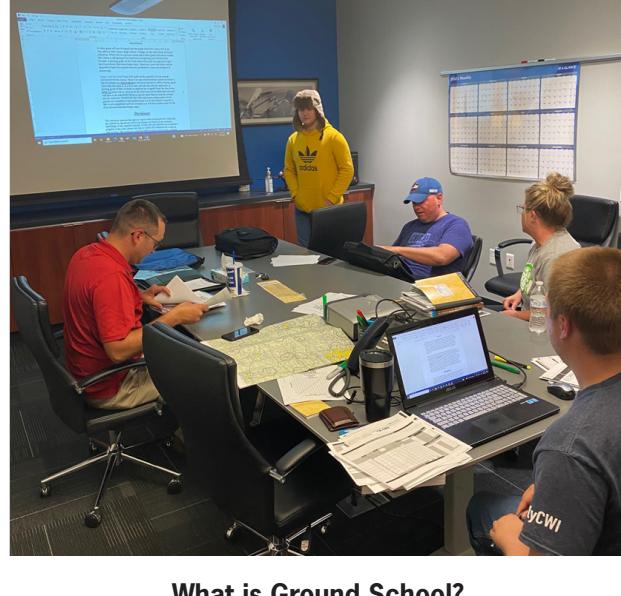

This chart below contains the following information for each intersection location: Crashes per Million Entering Vehicles and Signalization information. The intersections are listed in descending order by crashes per MEV. All below intersections have collision rates exceeding statewide average of 0.7 collisions per MEV.

| Intersection | Crashes Per MEV | Signal Present | Warranted |
|---|-----------------|----------------|------------|
| Mill Creek Parkway & 16th Street NW | 2.25 | No | No |
| 7th Avenue South & South 4th Street | 2.05 | Yes | Yes |
| 7th Avenue South, Bluff Blvd, & Thorwaldsen | 1.79 | Yes | Yes |
| 8th Avenue South & South 4th Street | 1.74 | Yes | Yes |
| 13th Avenue North & North 11th Street | 1.49 | Yes | Yes |

CLINTON MUNICIPAL AIRPORT

PRIVATE PILOT GROUND SCHOOL AT CLINTON MUNICIPAL AIRPORT

**What is Ground School?**

In order to earn your Pilot's License, you are required to pass a Federal Aviation Administration written test. In ground school, you will learn the information covered on the FAA's written test. Topics covered include:

- Aerodynamics
- Aircraft Performance
- Airspace
- Weather Theory
- Communications & Radar Services
- How to read & understand aviation sectional charts
- Flight Operations
- FAA Regulations
- Safe Flight Operations
- Navigation
- Weight and Balance

The Ground School Course lasts eight weeks and includes two practice tests to help prepare the students for the written test. Once you complete the class, and pass a practice test a flight instructor will sign your logbook off to take the FAA's written test.

This is the first formal ground school held at the Clinton Municipal Airport since P&N Flight and Charter started their operations in July of 2019. They will be holding another ground school this fall starting September 23rd. Classes are open to anyone age 16 and up.

Please call P&N Flight and Charter at 563-244-4770 if you are interested in signing up for the fall ground school course.

Edward Jones

BUILDING & NEIGHBORHOOD SERVICES

BUILDING PERMITS

It's a beautiful summer out there, and there are many building and remodeling projects in the planning stages or going forward. Many are still cleaning up properties from Derecho and COVID-19 continues throwing curve balls at us with limitations on building materials. It looks like this is going to be a very busy and forward moving time for the city and its citizens. Be sure to come to Central Fire Station / Building and Neighborhood Services, to get your building permit before any work begins. Roofs, siding, fences, decks, pools, accessory structures/ sheds, and urban chickens, all need building permits, along with water heaters, furnaces, just to name a few. If you are unsure if you

need a building permit, call. Working without a permit can get costly, as fees double and you could be subject to civil citations or municipal infractions.

Our goal is to always work with the permit holder to have a smooth project. Permit applications and select ordinances can be found at: www.cityofclintoniowa.us/departments/building_codes/documents_and_forms.php

We ask for 24-hour notice for building permit inspections, but will do what we can to keep your projects moving along.

Thank you for your cooperation, and SAFE AND HAPPY BUILDING!

ZONING BOARD OF ADJUSTMENT

Volunteering is the ultimate exercise in democracy. You vote in elections once a year, but when you volunteer, you vote every day about the kind of community you want to live in.

The Zoning Board of Adjustment is still looking for a board member. You can serve up to 2 - five-year terms. If there is a hearing, we meet the 3rd Wednesday of the month at City Hall and are typically less than an hour.

You don't need to know much about zoning to be on the board – we provide you all the information for hearings.

Applications are available on the City's website: <http://www.cityofclintoniowa.us/> and can be requested by sending an email to clerk@cityofclintoniowa.us. Please contact the City Clerk's office with any questions at (563) 244-3421. Women and minorities are encouraged to apply.

REGIONAL WATER RECLAMATION FACILITY (RWRF) DEPARTMENT

RESTAURANT REMINDER

Early last spring the City passed an ordinance requiring restaurants to install grease interceptors no later than June 30, 2020. Letters were sent out to all known Food Service Establishments to notify them of the change. The City also offered an incentive at the time to pay 50% of the installation cost up to \$1500. Ten Food Service Establishments took advantage of the program.

Some restaurants have already been inspected this year and notified in person of the upcoming change. The intent of this ordinance is to keep as much oil & grease out of the sewers to avoid sewer blockages and to reduce the maintenance costs which will help keep the sewer rates down.

A lot of restaurants believe if they do not use a deep fryer that they do not have a grease issue. The truth of the matter is most of the Fats, Oil, and Grease come from doing dishes. There are "Best Management Practices" that can be implemented to reduce the amount of FOG going into your interceptor reducing the amount of times it will need to be emptied.

In this article we have included a copy of the installation and maintenance requirements of the updated "FOG" ordinance.

If you have any questions, please feel free to call the Regional Water Reclamation Facility at 563-243-4064 and we will be happy to assist in any way we can.

§ 52.038 INSTALLATION AND MAINTENANCE REQUIREMENTS.

(A) Installations.

(1) All establishments subject to this chapter shall have a grease interceptor installed and in fully operational condition no later than June 30, 2020. Any establishment that demonstrates timely compliance with this section shall be entitled to a one-time rebate of 50% of the total cost of installation of the grease interceptor, with the maximum rebate payment not to exceed \$1,500. This rebate would only be available to businesses that have installed a compliant grease interceptor between July 1, 2018 and June 30, 2019. No rebates issued pursuant to this section shall be approved or issued for grease interceptors installed after June 30, 2019. However, if an establishment begins installation of a compliant interceptor before June 30, 2019, a rebate shall be approved if the installation of such interceptor is completed within 30 days of commencement of installation, even if such installation is not complete until after June 30, 2019.

(2) New facilities, food processing or food service facilities which are newly proposed or constructed, or existing facilities which will be expanded or renovated to include a food service facility, where such facility did not previously exist, shall be required to design, install, operate and maintain a grease interceptor in accordance with locally adopted plumbing codes or other applicable ordinances. Grease interceptors shall be installed and inspected prior to issuance of a certificate of occupancy.

(3) Existing facilities. Existing grease interceptors must be operated and maintained in accordance with the manufacturer's recommendations and in accordance with these Model Standards, unless specified in writing and approved by the POTW.

(4) All grease interceptor waste shall be properly disposed of at a facility in accordance with federal, state, or local regulation.

(B) Cleaning and maintenance.

(1) Grease interceptors shall be maintained in an efficient operating condition at all times.

(2) Each grease interceptor when cleaned shall be fully evacuated.

(b) Name, signature, address, and phone number of the person who generated the waste and the date collected;

(c) Type and amount(s) of waste collected or transported;

(d) Name and signature(s) of responsible person(s) collecting, transporting, and depositing the waste;

(e) Date and place where the waste was deposited;

(f) Identification (permit or site registration number, location, and operator) of the facility where the waste was deposited;

(g) Name and signature of facility on-site representative acknowledging receipt of the waste and the amount of waste received;

(h) The volume of the grease waste received; and

FINANCE DEPARTMENT

City of Clinton - Budget FY2022

The General Fund is the main operating fund for the City. Special Revenues are earmarked for and restricted for specified purposes. The Road Use Tax Fund is an example of a special revenue fund.

TIF = Tax Increment Financing utilized by many local governments for specified purposes. The interest & principal payments on debt.

The debt service fund is established to service interest & principal payments on debt.

Capital projects consist of various types of financial resources utilized in the acquiring or constructing of capital facilities or assets.

Proprietary funds are used to account for services financed and delivered in a manner similar to private industry.

Transfers Out supports the general fund.

POOLS, THE RULES!

Want to put a pool in your back yard? Some things to consider:

* Anything under 24" that does not have a pump or filter, is considered a wading pool, and you don't need a permit, but should take precautions to protect yourself and small children who don't know the rules. Cover, secure, or empty the wading pool when not in use.

YOU NEED A PERMIT IF:

- Your pool can hold over 24" of water and/or having a pump/filter....
- Must have a 48" barrier. Pool walls above 48" with a lockable or removable ladder ok. Or a fence 4' and over.
- Must have a GROUND FAULT CIRCUIT

BREAKER AT THE ELECTRIC PANEL. The whole circuit needs protection, not just the outlet.

- Must be located in side or rear yard. Corner lots are tricky.
- Must be 10' away from any overhead power lines.
- Must be 5' away from any underground lines.
- Must have pump/filter grounded and bonded.
- Must be 2' from any property line.
- Must invite BNS staff over for first pool party/bbq. (kidding. just seeing if you were paying attention thru all those rules)

Have fun out there, and stay safe!!

NEW INSPECTOR

Building and Neighborhood Services would like to welcome Eli Voss to our team. Among the many tasks at BNS, Eli will be focusing on permit, rental, and code enforcement inspections. He will also be assisting with fire and life safety inspections and investigations.

Eli comes to us with a diverse background. He spent 20 years in the con-

struction trades specializing in plumbing, heating and air conditioning and even serviced the Clinton area. After that, he worked serving the Davenport Fire Department for 20 years as a firefighter, fire inspector, fire investigations, and EMT. After that, he worked for Iowa Department of Transportation as a Safety Service Patrol office specializing in traffic incident management.

Eli and his family currently live in rural DeWitt, and are looking forward to relocating to the City of Clinton.

Welcome aboard, Eli.

FENCES - (RESIDENTIAL)

Thinking about putting up a fence? Here are a few rules to go by:

- It is your responsibility to know where your property line is.
- Fences go on your side of the property line and can be located up to the property line.
- You MUST call Iowa One Call 811 before you dig.
- Fences in front yards can be no greater than 3' privacy/picket or 4' chain link.

Stop in at BNS, and we will be glad to help you with the process.

Residential fence permit fees are \$65.

Regency Retirement
D210514585

STREETS & SOLID WASTE DEPARTMENT

Public Works Department: Hours of Operation: 7:00 am – 3:30 pm
 Phone: 563-242-2144, then option 3 (Public Works), then option 3 | Phones Answered from 8:00 am – 3:00 pm

The City of Clinton Public Works Departments strive to maintain the safety and health of our community in all our endeavors. Public Works consists of the following 4 departments:

The Streets Department's **6** employees have several responsibilities within the city's right-of-ways. Some of these responsibilities include: pothole repairs; putting up and replacing street signage; street sweeping; snow & ice removal on city streets; alley grading; right-of-way mowing and weed spraying; and removing fallen trees, branches, and debris within the roadway.

The Solid Waste Department's **6** employees are responsible for the collection of the city-owned garbage, yard waste and recycling carts. Yard Waste begins the first full week of April and ends the last week of November. The Solid Waste Department is also responsible for taking the orders for delivery and cancellation of the city-owned carts. The Solid Waste Department also assists with snow removal when a "Snow Emergency" is declared.

The Sewer Maintenance Department's **4** employees maintain the storm and sanitary sewer systems throughout the city. The Sewer Maintenance Department also assist with snow removal when 1 or more inches of snow is forecasted.

The Facilities and Grounds Department's **6** employees maintain city owned property and buildings throughout the city. The Facilities and Grounds Department maintains about 500 acres of park land, multiple miles of recreational trails, many playgrounds, a recreational vehicle park and sports facilities including a minor league professional baseball stadium. The Facilities and Grounds Department also assist with snow removal when 1 or more inches of snow is forecasted.

Residents are encouraged to use the OsTicket system to generate a work order for any work needed within Public Works. <http://ticket.cityofclintoniowa.us/ostic/>

As a reminder when driving around town, we ask that you please use caution and slow down when approaching street crews in the roadway. Thank you!

By following these two simple rules, you can help save lives, avoid receiving a traffic ticket and prevent the potential loss of your driver's license. Iowa law requires motorists to:

1. Change lanes or slow down, absent any other direction from a peace officer, when approaching the following vehicles, as provided in (Iowa Code section 321.323A):
 - A stationary emergency vehicle that has its flashing lights activated.
 - A stationary tow, recovery, maintenance, construction, solid waste or recycling collection vehicle that has its flashing lights activated.
 - Any stationary motor vehicle, including a passenger vehicle, that is continually displaying its emergency signal lamps (i.e., standard hazard lights).

2. Yield the right of way to an emergency vehicle displaying flashing lights or giving an audible signal by moving over to the right, stopping and waiting until the vehicle has passed before proceeding. (Iowa Code section 321.324).

Streets Department Information

Debris in Street or Alley

City Ordinance: § 97.003 Placing Debris on Street or Alley

It is unlawful for any person to throw or deposit on any street or alley any glass, glass bottle, nails, tacks, wire, cans, trash, garbage, rubbish, litter, offal, leaves, grass or any other debris likely to be washed into the storm sewer and clog the storm sewer, or any substance likely to injure any person, animal or vehicle.

(Iowa Code § 321.369) (1999 Code, § 135.03) Penalty, see § 10.99

Tree Responsibility

City Ordinance: § 98.06 Duty to Trim Trees

The owner or agent of the abutting property shall keep the trees in or overhanging the street trimmed so that all branches will be at least **13 feet** above the surface of the street and **nine feet** above the sidewalks. If the abutting property owner fails to trim the trees, the city may serve notice on the abutting property owner requiring that such action be taken within five days. If such action is not taken within that time, the city may perform the required action and assess the costs against the abutting property for collection in the same manner as a property tax. Except as allowed in this section, it is unlawful for any person to trim or cut any tree in a street or public place without first obtaining authorization from the city. The Building and Neighborhood Services Official or his or her designee shall have the power to enforce this section.

(Iowa Code §§ 364.12(2)(c), 364.12(2)(d), 364.12(2)(e), 364.12(3)(b)) (Ord. 2437, passed 12-14-2010) Penalty, see § 98.99

SINGLE-STREAM Recycling

Thank you City of Clinton residents for your continued support at making our Single-Stream Recycling program a success.

To find out more about Single Stream Recycling you can go to the City's website at www.cityofclintoniowa.us.

Search under the City Departments, then Solid Waste and finally click on Single-Stream Recycling Program. Information

about the program along with our collection route map and A-and-B week calendar can be found on this page.

If you have any suggestions on how to make this program even better, don't hesitate to contact the Solid Waste Department. We'd love to hear your ideas. Phone: 563-242-2144, the option 3 (Public Works), then option 3.
